

Statement of Candidacy

Candidate: Rebecca A. Renegar

Network: Computers & Technology

I envision the role of the Computers and Technology Network through three primary lenses:

1. Promoting technology as a vehicle for students to move from being consumers to producers of knowledge by building technology literacy, creative production, and fostering 21st Century learning skills.
2. Providing a forum for educators to connect and support one another through the regular sharing of resources and strategies for leveraging technology to enhance learning and meet diverse student needs.
3. Advocating for equitable services for gifted and talented students through technology integration as one vehicle for providing access to educational opportunities that extend beyond the walls of the classroom, and connection with other networks in support of the growth and development of all gifted and talented students.

With experience as an educator, presenter, and state and regional leader in gifted education, I would be honored to serve as Chair-elect.
