Anne Roberts, Creativity Chair-Elect
Doctoral Candidate in Educational Psychology: Giftedness, Creativity & Talent Development, University of Connecticut

Network Vision Statement
I am currently a doctoral candidate at the University of Connecticut in Educational Psychology: Giftedness, Creativity & Talent Development. I also previously worked as a gifted education specialist, Makerspace creator, and Destination Imagination Coordinator in Virginia. My work at UConn has focused on teachers’ perceptions of student curiosity and creativity in the K-12 setting.

I have been an active member of NAGC and the Creativity Network. I have given Creativity Network session presentations at NAGC conventions and have also served as the Newsletter Editor for the Creativity Network.

My goal for the Creativity Network is to encourage collaboration among graduate students, teachers, families, and researchers. I believe in helping members pursue the network goals of educating others about the importance of creativity and creating activities that reflect that goal.
